

21 November 2012

Angelfish Investments Plc
("Angelfish" or "the Company")

Final Results for the year ended 30 June 2012

Angelfish Investments Plc, an investment vehicle company, today announces its financial results for the year ended 30 June 2012.

Andrew Flitcroft, Finance Director, commented:

"This past calendar year has seen a marked change of circumstances for the Company. Angelfish has now strengthened its balance sheet converting significant debt burden into equity and now has a new majority shareholder, which has twice to date invested new money into the Company. The Company and its directors are actively seeking and pursuing potential value enhancing acquisitions in order to progress the Company. In this respect we would hope to be able to provide shareholders with an update when appropriate."

About Angelfish Investments

The Company's ordinary shares are admitted to trading on the ISDX Growth Market in London. The Company has the ISDX trading symbol ANGP.

DIRECTORS' REPORT

The directors present their report and financial statements of the company for the year ended 30 June 2012.

The company's ordinary shares are quoted on the ISDX Growth Market.

Principal activities and review of the business

During the year to 30 June 2012 the Company completed a debt to equity conversion of loans and creditors, including unpaid director fees, totalling £251,634 followed by a small equity fundraising to meet the Company's initial working capital requirements. No debt to equity conversions or equity fundraisings took place during the year to 30 June 2011.

In July 2012 the Company raised a further £90,000 through an equity fundraising to augment the Company's working capital reserves, and in particular to fund the due diligence necessary to further the Company's investment strategy. No equity fundraising took place in 2011.

The directors do not recommend payment of a dividend in relation to the year ended 30 June 2012 (no dividend was paid in the year ended 30 June 2011).

Future developments

The Company is now actively seeking suitable and appropriate acquisitions to return value to its shareholders.

On behalf of the Board

Andrew Flitcroft

Finance Director

**INCOME STATEMENT
FOR THE YEAR ENDED 30 JUNE 2012**

	Notes	2012 £	2011 £

Cash and cash equivalents at the end of the year	6,565	4,272

The accounting policies and notes set out below form an integral part of these consolidated financial statements.

Notes to the financial information

1. General information

The principal activities of Angelfish Investments Plc are those of a non-trading company.

The company is a public limited company incorporated and domiciled in the United Kingdom, having a registered office at 29A Stamford New Road, Altrincham, Cheshire, WA14 1EB

The registered number of the company is 6400833

2. Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards IFRS as developed and published by the International Accounting Standards Board (IASB) as adopted by the European Union EU, IFRIC interpretations and the Companies Act 2006 applicable to companies reporting under IFRS.

Standards, amendments and interpretations to existing standards that have been issued and are effective at the balance sheet date have been applied in the financial statements.

The financial information has been prepared on a going concern basis under the historical cost convention, as modified by the revaluation of certain financial assets at fair value through the income statement.

The preparation of financial information in conformity with IFRS requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial information are disclosed in the summary of significant accounting policies below.

3. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

Impairment of intangible assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment and whenever events or circumstances indicate that the carrying amount may not be recoverable. Assets that are subject to amortisation are tested for impairment when events or a change in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and the value in use. For the purposes of assessing impairments, assets are grouped at the lowest levels for which there are identifiable cash flows (cash generating units 'CGUs').

Property, plant and equipment

All property, plant and equipment is shown at cost less subsequent depreciation and impairment. Cost includes expenditure that is attributable to the acquisition of the items. Depreciation is provided at rates to write off the cost less estimated residual value of each asset over its estimated useful life, as follows:

Computer equipment	100%	straight line
Office equipment	33%	straight line

The residual values and lives of assets are reviewed and adjusted, if appropriate, at each balance sheet date.

Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired.

The amount of any provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within "administrative expenses". When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against "administrative expenses" in the income statement.

Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash.

Trade and other payables

Trade and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Foreign currency translation

(a) Functional and presentation currency

The financial information is presented in pounds sterling, which is the company's functional and presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Revenue recognition

Revenue in 2011 was from services derived primarily by marketing online gaming products available by the groups associated websites. These online games comprised of Poker and Casino, with the revenue recognised in the accounting periods in which the underlying gaming transactions occur. Revenue represented the commission charged or tournament entry fees where the player has

concluded his or her participation in the tournament. Casino revenue represented net house win. All revenue was calculated gross before any promotional bonuses. These activities are now discontinued.

Segmental reporting

A business segment is a group of assets or operations engaged in providing services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing services within a particular economic environment that is subject to different risks and returns from other segments in other economic environments.

Expenses

All expenses are accounted for on an accruals basis.

Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Capital

The objectives when managing capital are to safeguard the company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a capital structure that optimises the cost of capital. In order to maintain or adjust the capital structure the company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Capital comprises all components of equity; share capital, share premium, and retained earnings.

Equity Settled share option plan

The Company has applied the requirements of IFRS2 Share-based payments in accordance with current provisions. The company issues equity-settled share based payments to certain employees, which are measured at fair value at the date of grant. The fair value determined at the date of grant is expensed on a straight line basis over the vesting period, based on the company's estimate of shares that will eventually vest. The fair value is determined by use of the share based payments intrinsic value. Management do not believe the fair value can be measured reliably by use of an option pricing model, based on the fact that the company has only relatively recently obtained a listing and no reliable historical data is available.

Future changes in accounting policies - standards issued but not yet effective

As of the date of authorisation the following Standards were in issue but not yet effective:

IFRS 9 – Financial Instruments

IFRS 10 – Consolidated Financial Statements

IFRS 11 – Joint Arrangements

IFRS 12 – Disclosure of Interests in Other Entities

IFRS 13 – Fair Value Measurement

Amendments to IFRS 7 – Disclosures – Offsetting Financial Assets and Financial Liabilities

IAS 19 – Employee Benefits

IAS 27 – Separate Financial Statements

IAS 28 – Investments in Associates and Joint Ventures

Amendments to IAS 32 – Offsetting Financial Assets and Financial Liabilities

4. Segmental analysis

Based on risks and returns, the directors consider that the primary reporting format is by business segment. The directors consider that there is only one business segment, being the commission earned through signed up members gained by advertising and promoting the company's website. Therefore, the disclosures for the primary segment have already been given in this financial information.

Geographical segment

	2012 £	2011 £
Revenue from services:		
UK	-	9,465
Other European	-	24,666
Rest of the world	-	140,701
Total	-	174,832

Balance sheet – Net book value of segment assets

	2012 £	2011 £
UK	-	30,000
Other European	-	-
Rest of the world	-	-
Total	-	30,000

5. Expenses

The following material expenses are included in cost of sales:

	2012 £	2011 £
Entraction - revenue share	-	61,936
Entraction - player deposit processing fees	-	14,236

The following material expenses are included in advertising, marketing and promotion:

	2012 £	2011 £
Advertising and marketing	1,242	31,332
Promotional activity	-	53,486
PR costs	710	375
VAT expense	8,300	-

The following material expenses are included in administrative expenses:

	2012 £	2011 £
Directors' emoluments	12,000	81,101
Hotel and travel	1,518	2,958
Professional fees	6,249	31,351
Fair value of share options	-	(19,473)

6. Loss before tax

Loss before tax, all of which arises from the company's principal activities, is stated after charging:

	2012 £	2011 £
Auditors' remuneration:		
- Audit services	4,000	4,000
- Other services	-	-
Depreciation expense	52	376
Exchange differences expense/(gain)	-	(1,274)

7. Key management and directors emoluments

	2012 £	2011 £
Directors' emoluments	12,000	81,101
Emoluments of the highest paid director	12,000	29,217

There are no employees except for the directors.

8. Taxation expense

The taxation provision for the period is different to the standard rate of corporation tax in the UK of 24% FY 2012 (26% FY 2011). The differences are explained below:

	2012 £	2011 £
Loss before tax	(44,144)	(340,469)
Taxation at the UK corporation tax rate of 25.5% (2011: 27.5%)	(11,257)	(93,629)
Effects of:		
Loss during the year	11,257	93,629
Tax expense	-	-

No deferred tax asset has been provided in respect of tax losses as their crystallisation is not certain.

9. Dividends

No dividends have been proposed by the company for the year ended 30 June 2012 or the prior period.

10. Earnings per share

The calculation of the basic earnings per share is based on the earnings attributable to ordinary shareholders divided by the weighted average number of shares in issue during the year.

The calculations of diluted earnings per share are based on the basic earnings per share adjusted to allow for the issue of shares on the assumed conversion of all dilutive options.

Reconciliation of the earnings and weighted average number of shares in the calculations are set out below.

	2012			2011		
	Earnings £	Weighted average number of shares	Per share amount (pence)	Earnings £	Weighted average number of shares	Per share amount (pence)
Basic earnings per share	(44,144)	84,163,313	(0.01)	(340,469)	42,166,667	(0.08)
Diluted earnings per share	(44,144)	84,163,313	(0.01)	(340,469)	42,166,667	(0.08)

Nil (2011: 807,378) share options have not been included in the above as they are anti-dilutive.

The information contained in this announcement has been extracted from the audited Directors' Report and Financial Statements for the year ended 30 June 2012, which contain an unqualified audit report.

THE DIRECTORS OF THE COMPANY ACCEPT RESPONSIBILITY FOR THE CONTENTS OF THIS ANNOUNCEMENT
